

Are Those Dark Circles or Years of Eye Makeup Absorbed Deep Into Your Skin? Protect & Save Your Skin & Eyelashes from Damage & Premature Aging

HOW TO USE OUR BUTTERFLY EYELASH GUARD®

for EYE MAKEUP APPLICATION and REMOVAL

Following the Instruction is Crucial!

Eyelash Guard fits precisely under your eyelashes, if adjusted correctly. It does not touch the eyelashes, it just protects your skin. It is hands-free, thin & weightless, breathable, non-sticky, mascara resistant, lint, gel, adhesive & latex free. Eyelash Guard is the ONLY beauty tool that can

help to get mascara all the way to the lash line! It helps create a straight edge for eye shadow application. Women with POOR VISION & with SHAKY HANDS find this tool essential.

1) Eyelash Guard is very easy and fast to apply & safe to use. Finish your face makeup. Prepare for the application / removal of eye shadow & mascara or eyelash extensions, perms or tint.

2) Bend the middle part of Eyelash Guard over the **tip** of your little finger and make a loop around it.

3) Fold Eyelash Guard slightly at the middle so it's ends can symmetrically meet. DO NOT press flat at the middle of Eyelash Guard! Keep the oval arch at the middle to go over the nose bridge.

4) Never miss this very important step. Press the shield as shown on the picture to make a firm loop **DO NOT** press flat at the middle of the device! Keep the oval arch at the middle to go over the nose bridge. You are creating a size adjuster & the mechanism that brings Eyelash Guard directly in a row with the roots of your eyelashes.

5) **DO NOT STRETCH** the size adjuster before you put on Eyelash Guard on your face. The middle nose part can be adjusted (widen or narrowed) to match the line of the roots of eyelashes and to avoid the pressure on the skin, after the ear loops will be nicely and comfortably tightened up.

6) Place and **HOLD** the shield with your fingers over the nose bridge during the securing Eyelash Guard with the latex **FREE** elastic ear loops over your ears.

7) **HOLD** the molded nose piece by your fingers and adjust the ear loops depending of the width of your face

8) You have several ways to wear Eyelash Guard: over the ear, over the upper tip of the ear and as crossed loop (one or more times depending of the width of your face). You may tight knots on each ear loop.

9) The middle nose part can be adjusted (widen or narrowed) to match the line of the roots of eyelashes and to avoid the pressure on the skin, after the ear loops will be nicely and comfortably tighten up. The lateral sides of Eyelash Guard can be moved slightly up or down for the perfect fit to the every shape of eyes.

10) Apply eye shadow and mascara. The texture of Eyelash Guard has no lint. Nothing will stick to your mascara brush. You can test the intensity of your makeup color and width of your brush on the white shield. It is disposable. After the mascara dries, take off Eyelash Guard.

11) To remove makeup, use moistened cotton swabs, pressing-releasing gently against the shield all the way through the eyelashes from the roots to the ends of the eyelashes.

Butterfly Eyelash Guard will PROTECT and SAVE the delicate and sensitive skin around your eyes from Damage caused by the daily use of harsh chemicals during the application and removal of eye makeup and rubbing, pulling and stretching the skin during the process. It will protect your skin from mascara residue that is able to penetrate into the dermis due to Micronized-Nano particles that are widely added to makeup. These particles can be permanently deposited in the skin, causing dark pigmentation around eyes and other serious problems. Women have been using this process forever without understanding that this is the main reason which is causing premature aging, skin damage, dryness, pigmentation, wrinkles and loss of eyelashes.

These are SCIENTIFICALLY PROVEN FACTS. Ask your Dr. Ophthalmologist! Google it !

PROFESSIONAL USE

Eyelash Extensions & Perms
 Gel Free ★ Adhesive Tape Free ★
 Latex Free ★ Allergy Free Method ★
The Butterfly Eyelash Guard®

This is NOT Adhesive Tape! Directions See Below.

Place Eyelash Guard under the eyes slightly lower than for the mascara application or its removal. But first, cut two pads the shape of half-moon with 4x4, paper towel or other soft and lint free material and place them under the Eyelash Guard which will hold pads very well with NO gels, NO water and no tape (see pic.) The little dry pads underneath SHALL NOT be horizontally stretchable along the eyelash line, because it will NOT provide tight fit over the bottom eyelashes. Keep it on your mind during the cut of the half moon pads. Some of technicians suggested to use silicone pads underneath of Eyelash Guard. Cut those silicone pads as two strips to cover lower lashes, cover silicone strip-pads with Eyelash Guard to hold those pads still without use of adhesive tape. If you use full size silicone pads the skin will not breathe underneath and it will sweat. Your client will not feel comfortable with those full size silicone pads

during the lengthy eyelash extension procedure. Protection of the skin and eyelashes will take just a few minutes of your time, however you will be greatly appreciated by your clients for your care. You will protect yourself and your business from substantial financial loses. Please look at the correct position and adjustment of Eyelash Guard to the nose bridge on the pictures.
